PROFESSIONAL SUMMARY

Information Technology graduate with knowledge and hands-on experience in website development and IoT projects. Familiar with front-end development, microcontrollers, sensors, and basic system integration through academic and personal projects. I want to learn new technologies and build practical solutions through real-world experience.

EDUCATION

Bachelor of Science in Information Technology

[College of Sciences, Technology and Communications Inc.](#) Sariaya Quezon | 2022 - 2026

SKILLS

- **Programming Languages:** Java, C++, HTML, CSS, JavaScript
 - **Frameworks & Platforms:** Android Studio, Firebase
 - **Hardware & IoT:** Arduino Uno, ESP32, circuit wiring, and sensor integration
 - **Tools:** Visual Studio Code, Arduino IDE, Microsoft Office, Google Workspace
-

PROJECTS

iCapsicum: IoT Android-Based Kalahari Bell Pepper Monitoring and Drip Fertigation System

[Quezon National Agricultural School](#)

- Built a system to monitor Kalahari bell pepper plants and automatically manage drip irrigation and fertigation
- Used microcontroller and sensors to collect data and send it to Android application
- Built the Android application with Android Studio and Firebase so users could check plant conditions and control watering remotely
- Aimed to help the school reduce manual monitoring and give the plants more consistent care

Automatic Pet Feeder

Personal Project

- Built an automatic pet feeder using an Arduino that dispenses food on a set schedule, so pets get fed on time even when no one's home
- Supported both interval-based feeding and fixed feeding times, depending on the owner's schedule
- Used a servo motor to control the feeding mechanism and a sensor to help confirm each feeding
- Made feeding pets more consistent and less dependent on someone remembering to do it manually

Vyryfy: Scam and Fraud Detection Website

Personal Project

- Built a website that helps people check if a link, text message, QR code, or similar content could be a scam or fraud attempt
 - Focused on the front-end using HTML, CSS, and JavaScript, keeping it simple to paste a link or message and get a quick result
 - Built to help everyday users spot phishing links and fake messages before clicking or sharing personal information
-

SEMINARS ATTENDED

- ITSC 2025: IGNITE
- ITSC 2025: ELEVATE
- ITSC 2024: ELEVATE
- ITSC 2024: TRAVERSE
- Building Your Career Path in Tech
- ITSC 2023: LIFT OFF
